

THE NDB ADDRESS LIST 2005/6

The new edition of this priceless and unique publication is now available from the Danish Shortwave Club International (DSWCI). This 52-page A4 booklet, edited by Finnish NDB enthusiast Torre Ekblom, and published in July 2006, lists QSL addresses for a large number of European NDBs, and is probably the only publication of its kind currently available for the use of the dedicated NDB QSL hunter. It lists information such as individual QSL addresses that have worked in the past, and also central addresses, many essential for verification of those waypoint beacons, or beacons that are difficult to find an individual address for.

This publication is available from:

Mr. Bent Nielsen, Egekrogen 14, DK-3500 Vaerloese, Denmark.
