

# NON DIRECTIONAL BEACONS OF EUROPE 9th EDITION 2005

by Robert Connolly

## FEATURES OF THE NINTH EDITION:

Also available on computer disk as Text Files to suit almost all types of computers, and on a CD-Rom as a pdf file supplied with Adobe Reader for PC.  
Contains approx 3100 Beacons & their co-ordinates!  
Coverage from eastern Canadian coast to Pakistan, and from Arctic to almost to the Equator  
Comb binder & splash proof front cover for easy desktop working!  
Chapter on beacon operating & Morse decode chart including International Characters!  
Easy to use format with Aero, Marine, DGPS, Navtex and Reverse Frequency Sections!  
The cheapest Beacon Guide available!

Produced by Robert, editor of the quarterly Short Wave Magazine "Maritime Beacons" column, this new edition has been completely re-edited extends to 70 A4 printed pages. It contains details on nearly 3100 beacons with callsign, frequency, location, country, and now includes co-ordinates of most beacons. It is comb bound with a splash proof front cover.

The format is similar to earlier editions with introduction chapters giving details of NDBs, Aero section, Marine section, the popular Reverse frequency listing, and DGPS stations in Europe. The geographical coverage has been slightly extended and now covers from the East Coast of Canada to 70 degrees East (edge of Pakistan) and from the Arctic in the North to approx 12 degrees North. The usual easy to use format has been retained with the use of alphabetical / frequency order.

**PRICE:** The price of this new edition is **£8.00 PLUS POSTAGE & PACKING (£2.00 FOR UK / £2.50 AIRMAIL FOR EEC / £3.00 AIRMAIL FOR NON EEC /USA) OR 15 EUROS INC AIRMAIL POSTAGE (EEC EUROPE ) / 20 US DOLLARS FOR NON EEC / USA.
